

**Figure 1**

Figure 1 consists of two panels, (a) and (b), showing histograms of the number of non-zero elements in the sparse matrices  $\tilde{A}$  and  $\tilde{B}$ , respectively.

(a)

The x-axis is labeled "Number of non-zero elements" and ranges from 0 to 1000. The y-axis is labeled "Frequency" and ranges from 0 to 10. The histogram shows a distribution peaking around 600-700 non-zero elements.

(b)

The x-axis is labeled "Number of non-zero elements" and ranges from 0 to 1000. The y-axis is labeled "Frequency" and ranges from 0 to 10. The histogram shows a distribution peaking around 800-900 non-zero elements.
